

Swiss Association
for Quality and Management
Systems (SQS)

ISO 3834-4:2021 in combination with ISO 9001

Quality requirements for fusion welding of metallic materials

Incentive

The ISO 9001 standard stipulates the regulation of specific processes, such as the welding of components. The specific requirements are defined in the ISO 3834-4 standard. It is suitable for welding operations that make products in regulated and unregulated fields. Certification pursuant to ISO 3834-4 highlights the great significance of welding.

Outcome

ISO 3834-4 supports customer-oriented solutions and optimises process control. It reduces risks and costs.

Target groups

Manufacturers of welded components in regulated and unregulated fields.

Validity

3 years – there is an annual audit to ensure that standards are being maintained and a recertification audit after 3 years.

Recognition

The SQS certificate of conformity with ISO 3834-4 has international validity and is recognised worldwide through the IQNET membership.

Combinations

ISO 3834-4 can be extended to the integrated management system in combination with ISO 9001 (quality management), ISO 14001 (environmental management) and ISO 45001 (Occupational Health and Safety Management).

Contact

Further general information can be obtained from our office in Zollikofen.

Our auditors are also available to answer queries on specific subjects.
